

Joseph Warren Middle/High School Bowling Green, KY

Projects Completed: \$ 600,000

Projects In Process: \$ 8,055,000

Dates: 2008 - 2010

Project Description: Currently under construction, this combined Middle School and High School will total 339,000 square feet when completed in August 2010. This \$55 million project is one of the largest to be built in the State of Kentucky. PPMI's scope of work includes all plumbing (above/below ground waste, storm, domestic water, and roof drains), compressed air, natural gas, sheet metal, and geothermal HVAC systems.

T.C. Cherry Elementary School Bowling Green, KY

Projects Completed: \$ 250,000

Projects In Process: \$ 1,850,000

Dates: 2008 - 2009

Project Description: A new 55,000 square foot elementary school will be built adjacent to the existing 58-year old school. PPMI's scope of work includes all plumbing (above and below ground waste and storm, domestic water, and roof drains), compressed air, natural gas, sheet metal, HVAC systems, and solar water heating.

Middle Tennessee State University Murfreesboro, TN

Projects Completed: \$ 2,480,000

Projects In Process: \$ 1,720,000

Dates: 2007 - 2009

Project Description: A new south campus chilled water plant supplying two-thirds of MTSU's cooling needs was recently built. PPMI was the prime mechanical contractor on site whose scope of work included all plumbing, piping, HVAC, and water distribution systems. PPMI installed three 1500 ton chillers, three 1500 ton cooling towers, and associated control systems.

Red Hill High School Bridgeport, IL

Projects Completed: \$ 2,050,000

Projects In Process: \$ 0

Dates: 2005

Project Description: PPMI completed the plumbing, mechanical and HVAC package for the new 73,000 square foot high school building. This project incorporated a geothermal well loop system as a basis for the buildings heating and cooling system.
